

So whom it may concern,
 We want the genetically
 engineered foods off the
 shelves. ~~stop it~~. Until
 all the presently produced
 foods already in system
 are gone, we want them
 labeled "GMO" at the
 very least. Meantime
 we will simply not buy
 any foods in reg. super
 markets which are not
 certified organically grown.
 We will do the rest of our
 food shopping at the health
 food stores or grow our own.
